

# CLASSIC BEARINGS

# COMPACT BEARINGS

# COMPONENTS

# COMPARISON

## Classic

The classic ball bearing is a loose set consisting of 2 grooved discs and a ball cage with balls.

- Lower minimum order quantity
- Supports higher load
- Ungreased
- You can choose 2 different custom sizes for the discs

## Compact

The compact ball bearing is already assembled, greased, 100% tested, and closed.

- 1 single element
- Easy handling
- Designed for narrow spaces
- Low torque
- Greased

## Components

Components are available in various materials, such as brass, plastic, 100CR6 steel, or stainless steel.

- Ball cages, needle cages or discs
- You only buy what you need
- Lower minimum order quantity

# CREATIVE SOLUTIONS

## Automotive Sector

for different types of actuators such as in seat adjusters or for exhaust gas recirculation

## Furniture industry

for rolling elements and motion solutions

## Premium Consumer Goods

for professional or fully automatic home coffee machines and other household appliances

## Aviation

for actuators such as in gear units

## Medical Sector

for precise movements such as in armrests and hinges

## Various Industries

our versatile ball bearings can be used in a wide variety of applications

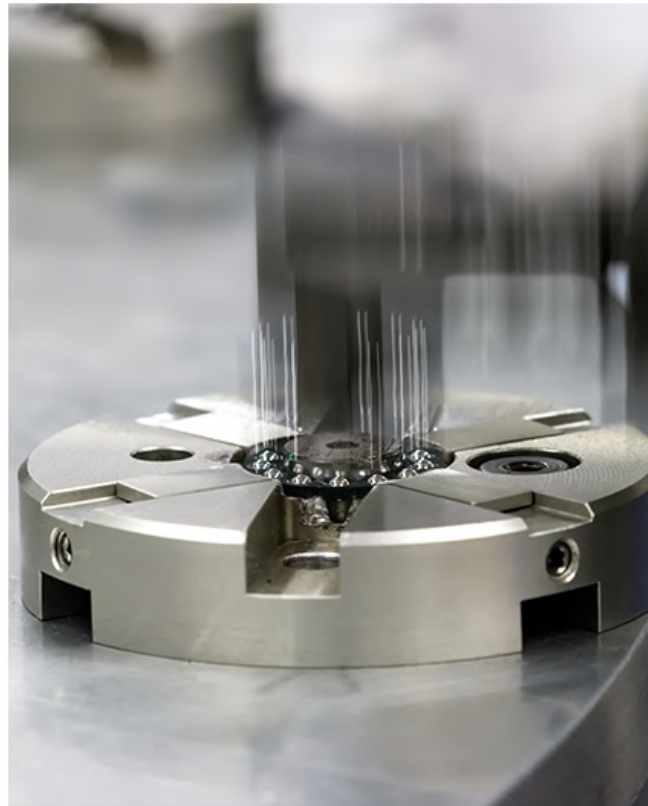

# COMMITMENT

## ENTHUSIASM

We enjoy complex production challenges with high quality standards

## PRECISION

Precision and high quality are what drive us - so you get exactly what you need

## PASSION

We help you create, design, discuss, plan, calculate, and produce your solution

**We'd love to hear from you!**
